UltraSafe

# UltraSafe® Needle Guards

## European Clinical Evaluation

### Objectives

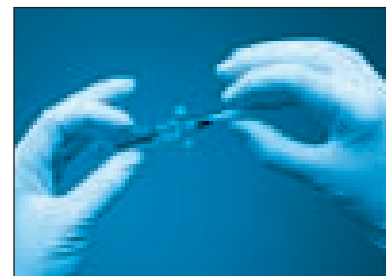

- Assess the level of concern in general about needle safety in Europe
- Determine the level of satisfaction with the UltraSafe Needle Guard

### Study Design

- 43 Hospitals used the UltraSafe Needle Guards for at least 3 months; six countries represented
- 907 questionnaires returned reporting information

### Key Results

- 91% of nurses were highly concerned about safety
- 85% of nurses stated that the UltraSafe Needle Guards satisfied their safety concerns
- A primary request was to have the UltraSafe device pre-attached by the drug manufacturer
